

Beacon Declaration and Process for the AI Age

Founding AIWS Trust Infrastructure and AIWS Lumina

Today, at Harvard University's Loeb House,
on the occasion of **America at 250: A Beacon for the AI Age**,
we stand not only to celebrate history,
but to help shape the future.

We honor 250 years of America —
250 years of freedom,
of creativity,
of democratic aspiration,
and of leadership
that has helped inspire the modern world.

But today,
we also look ahead.

We look ahead
to the **Age of Artificial Intelligence**.

And we affirm a truth of historic importance:

This new age cannot be guided by intelligence alone.
It cannot be guided by power alone.
It cannot be guided by innovation alone.

The AI Age must also be guided by **trust**.
By **responsibility**.
By **human dignity**.
By **culture**.
And by **moral purpose**.

For this reason,
we declare today
the advancement of two essential and complementary pillars
for the future of humanity.

The first is **AIWS Trust Infrastructure** —
a practical architecture of trust for the AI Age,
created to guide governance, institutions, business, and society
through standards, accountability, trusted implementation,
and human-centered values.

The second is **AIWS Lumina** —
a global cultural architecture for the AI Age,
grounded in **Love, Creativity, and Nobility**,
created to illuminate the human spirit
through culture, inspiration, beauty, and noble values
in a time of profound technological transformation.

Together,
these two pillars form a beacon for the AI Age.

AIWS Trust Infrastructure builds the architecture of trust.
AIWS Lumina illuminates the culture of humanity.

We further affirm
that the **Boston Global Forum** holds the leading role in this effort —
providing the strategic vision,
the core standards,
the guiding values,
and the international direction
for the advancement of both pillars.

All implementation partnerships and regional initiatives
shall be developed in alignment with the **strategy, standards, values, and leadership of BGF**.

In this spirit,
we welcome **Vietnam Report**
as a committed implementation and support partner
working with BGF to advance **AIWS Trust Infrastructure** and **AIWS Lumina**,
especially in **Vietnam, ASEAN**,
and in the activities leading toward the **10th anniversary of AIWS in 2027**.

We welcome cooperation with **LDP Global South**,
with the coordination of **Yasuhide Nakayama, Diet Member and Director of LDP Global South**.

We welcome **Media Tenor**
as a cooperating partner in Europe.

To realize this Declaration,
we establish today the **Beacon Process**:

BGF will lead.

Partners will implement in alignment.

And the road to AIWS 2027 will be a historic phase of realization.

A phase to advance **AIWS Trust Infrastructure.**

A phase to advance **AIWS Lumina.**

A phase to help build an AI civilization

that is not only intelligent,

but also **trustworthy, humane, creative, and noble.**

This is our Beacon Declaration and Process for the AI Age.
