**AIWS Lumina Laureates: Honoring Those Who Illuminate Humanity in the AI Age**

*AIWS Lumina*

As humanity enters the Age of Artificial Intelligence, the world must not only recognize technological achievement, but also honor those who illuminate the human spirit.

The Boston Global Forum will introduce the AIWS Lumina Laureates as a new initiative to honor artists, storytellers, writers, filmmakers, musicians, designers, athletes, and cultural stewards whose work, vision, and moral leadership advance human dignity, wisdom, creativity, compassion, and peace in the Age of Artificial Intelligence.

Inspired by the values of AIWS Lumina — Love, Creativity, Nobility, and Wisdom — this initiative reflects a simple but profound conviction: the future of artificial intelligence must be guided not only by intelligence, but by wisdom; not only by innovation, but by humanity.

The AIWS Lumina Laureates are the cultural counterpart to the America 250: AI Pioneers. Where the Pioneers built the foundations of the AI Age, the Laureates ensure that this age remains humane, beautiful, and worthy of the human spirit. They honor those who bring light to the human journey — the creators and cultural voices whose work helps society rise above fear, division, and narrow technological ambition.

The initiative will be formally announced on July 4, 2026, as part of the Boston Global Forum's special program commemorating America at 250 and advancing a new beacon for humanity in the Age of Artificial Intelligence. The first Laureates will be honored in 2027.

***In the AI Age, the world needs more than powerful machines. It needs luminous human beings.***

**BGF Lens** — *if the AI Pioneers give the age its intelligence, the Lumina Laureates help give it a soul. The initiative will celebrate those who help humanity see more beautifully, live more nobly, and build a wiser future together — ensuring that, at the height of its power, civilization chooses to remain human.*
