

THE JULY 4, 2026 COLLECTION

---

## **A New Beacon for Humanity** *in the Age of Artificial Intelligence*

*Nguyen Anh Tuan delivers remarks at the America at 250 Conference · Loeb House, Harvard University · May 1, 2026*

As the United States celebrates the 250th anniversary of the Declaration of Independence, the Boston Global Forum will present The July 4, 2026 Collection — a landmark set of

declarations, publications, and initiatives inspired by the enduring ideals of freedom, democracy, human dignity, trust, and innovation.

These works look beyond today's technological revolution. They ask a deeper question:

***How can humanity flourish in the Age of Artificial Intelligence?***

On July 4, 2026, the Boston Global Forum will publish and announce:

- ◆ **The Boston Declaration:** On the Primacy of the Human Person in the Age of Artificial Intelligence.
- ◆ **A Founder's Reflection by Nguyen Anh Tuan** — The Boston Declaration: Renewing America's Beacon for Humanity in the Age of Artificial Intelligence.
- ◆ **America at 250: A Beacon for the AI Age** — Special Edition.
- ◆ **America 250: AI Pioneers** — Special Edition.
- ◆ **The establishment of AIWS Lumina Laureates**, honoring those whose lives and work elevate humanity in the Age of Artificial Intelligence.

Together, these works affirm a simple but profound conviction:

---

*Artificial Intelligence should not merely make humanity more capable. It should help humanity become wiser, more compassionate, more creative, and more noble.*

---

July 4 will also mark the beginning of a new global journey. Inspired by The Boston Declaration, the Boston Global Forum and AIWS will launch the international initiative to develop the Constitution for Humanity in the Age of Artificial Intelligence, to be presented to the world in 2027 — bringing together AI pioneers, scientists, educators, artists, philosophers, public leaders, religious leaders, and citizens from around the world.

These initiatives are not simply publications. They represent a long-term commitment to building a future where intelligence serves wisdom, technology serves humanity, trust strengthens freedom, culture elevates civilization, and human dignity remains the guiding light of the AI Age.

We warmly invite friends, colleagues, partners, scholars, innovators, artists, and citizens around the world to join us in this new chapter.

To receive all official publications and announcements on the morning of July 4, 2026,  
please send your name, organization, and email address to:
